

## New User Interface for NOW:

A project well delivered by the Datatex Laboratory provides NOW with a totally new UI respecting the RIA rules: Rich Internet applications (RIAs) are web applications that have most of the characteristics of desktop applications, typically delivered either by way of a standards based web browser, via a browser plug-in, or independently via sandboxes or virtual machines. Examples of RIA frameworks include Ajax, Curl, GWT, Adobe Flash/Adobe Flex/AIR, Java/JavaFX

### Some of the key features:

- Improved Menus, with user defined icons, a favorites and recently used area and improved process search facility.
- Collections can be filtered, sorted and arranged by drag and drop functions and results stored for future use.
- Easier to read and reach function keys and icons.
- Full ability for mouse-less operation when needed.
